Robotic Gloveless
GMP Fill & Finish for Small Batches

Who We Are

We are White Raven - a flexible CDMO dedicated to making life-saving medicines accessible efficiently and safely. We are your innovative and agile partner, specialising in GMP Formulation and Aseptic Fill and Finish for clinical trials, orphan drugs, and more.

We provide a fully digital process, achieved through end-to-end process digitalisation, which allows you to access all your data through our customer portal. The whole manufacturing process is streamlined ensuring complete integration of our systems (MES, ERP, eQMS) until the final QP release of your product.

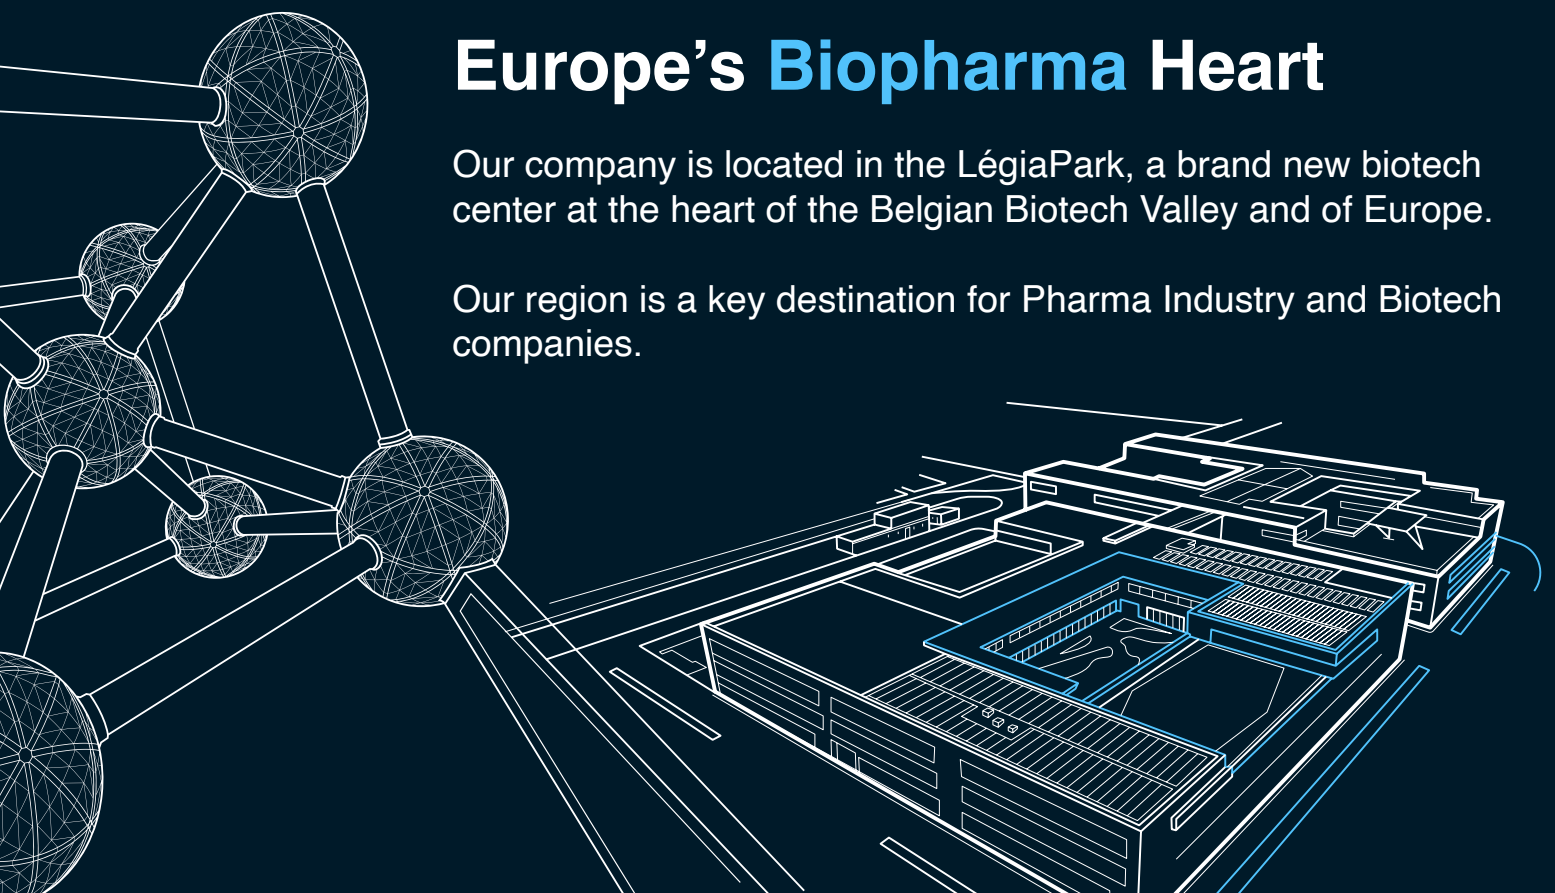

We tailor our services and products to align with the unique requirements of each client while respecting standard manufacturing procedures.

Our commitment to quality, innovation, transparency, and scientific excellence sets us apart.

Europe's Biopharma Heart

Our company is located in the LégliaPark, a brand new biotech center at the heart of the Belgian Biotech Valley and of Europe.

Our region is a key destination for Pharma Industry and Biotech companies.

Our Mission

“We specialise in GMP Formulation and Aseptic Filling of Injectable Drugs, focusing on small batches to cater to the unique requirements of clinical supplies and orphan drugs.”

Formulation Services

We provide a large range of formulation services adapted to small batches, with capabilities to work with mixing volumes as low as 50mL, and up to more than 20L. Thanks to single-use equipment supplies, we eliminate all risks of cross-contamination.

Aseptic Filling Solutions

Empowered by state-of-the-art aseptic filling technology, we present a fully robotic filling process thanks to our Gloveless Isolator, with no human intervention and are fully compliant with the new Annex-1.

We take care of your product by reducing the risks of environmental contamination to the lowest level. We offer the following services:

- Sterile filtration
- Batch size from ~100 up to ~20,000 units
- Containers
 - Polymer & glass vials (2 to 50mL)
 - Polymer & glass syringes (1 to 20mL)
 - Cartridges (1.5 to 20mL)
- Standard filling volume from 0.2 to 50mL - from statistical to 100% IPC.
- 100% visual inspection.
- Fully controlled environmental conditions during filling process.

Additional Services

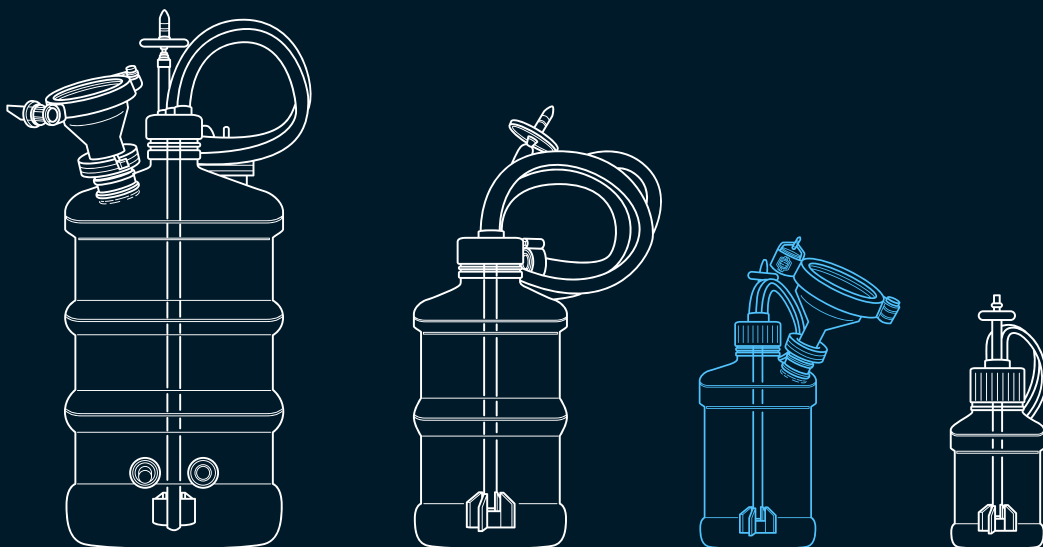

Through our network of partners, White Raven offers a wide variety of additional services such as analytical services, terminal sterilisation, complex secondary packaging, and much more.

Whether you're searching for a reliable manufacturer to release your batches or seeking a trustworthy CDMO partner, seize the day and take the first step toward accomplishing that by simply contacting us.
