We build:
What patients need to control their health data
What pharma needs to advance clinical research

Our Leadership Team

Vincent Keunen, CEO
30 years building major health software solutions (3 EHRs, 2 HIE platforms)

Vincent Dessard, Chairman
Software & interoperability expert

Marc Botteman, advisor
Founder Pharmerit / OpenHealth & HEOR KOL (200 publications)

Lucie Keunen, CMO
PharmD

X and LinkedIn: Andaman7

Pharma needs a real partnership with patients. That's what Andaman7 offers.

In short

- First, we offer patients a general health management tool they love.
- Second, we offer a highly innovative platform to collect patients' data for clinical studies (phase 3 trials, RWE, HEOR, CRaaCO, QoL, registries, pharmacovigilance)
- We are pioneering **Patient Mediated Research** see https://andaman7.com/a7dls
- We received high praise from key opinion leaders see https://www.andaman7.com/A7b2but

Our Unique Approach vs Competition

1. Andaman7 is, **first, a health management tool for patients**, offering a lifelong data solution, before serving as a clinical research tool. In contrast, our competitors primarily focus on research, often treating patient interests as an afterthought. Applied Clinical Trials article
2. Andaman7 **dramatically mitigates the risks** of privacy and security breaches by adopting a 'no health data in the cloud' policy. In stark contrast, our competitors' reliance on cloud storage for health data introduces significant vulnerabilities.
3. Andaman7 is a truly **global solution**, supporting over 20 languages with effective downloads from 50 countries. Our competitors are only focusing on the USA.
4. Andaman7's data acquisition process is highly automated, eliminating the need for lengthy contract negotiations with data sources.

Our Proprietary Technology

- Our proprietary technology is a dynamically generated mobile app with a liquid database and a health information exchange platform; it collects **all** types of data from many sources and sends it to researchers without cloud storage
- We are active in 20+ languages and have effective downloads in 50 countries
- We connect to 85% of US hospitals
- We use AI augmented tools to get the data and to make sense of it
- We are currently working on the **EHDS and are the leader in xShare + EU** upcoming standards (we were chosen to demonstrate progress to the EU commission)

Our Momentum

We have developed a **world class patient mediated** research organizations (CROs) and pharma. Our focu reactively.

Andaman7 is **certified FDA** 21 CFR part 11 + **EMA** Annex 11 + GCP + HIPAA + GDPR

Our Business Model

We offer patients a **free tool** to manage their health information in all autonomy - no strings attached.

Pharma and CROs pay us to run their clinical studies and collect data via patients that consent.

We use distributed and AI techniques to enable a powerful new way to run clinical studies.
