**YOUR ONE-STOP SHOP  
FOR ANALYTICAL SERVICES  
ON ONE SITE**

**EUROPEAN LEADER IN ANALYTICAL SCIENCES**

*Quality Assistance provides the pharmaceutical industry with all the analytical services required by EMA and FDA regulations for the development and marketing of innovative human medicinal products.*

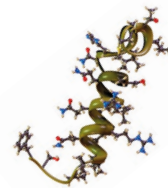

# Speed up people's access to new medicines

## PRODUCT-DEDICATED EXPERTISE

### New Chemical Entities, Oligonucleotides, Peptides

40 years' experience

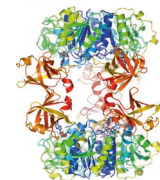

To meet your analytical needs, *Quality Assistance* provides you with scientific and technical support for the development of your NCEs. Our added value brings together a sound expertise in the analytical development of small molecules along with state-of-the-art facilities and equipment, all on one site.

### New Biological Entities, ADCs, mAbs, Proteins

19 years' experience

To accelerate the development and marketing of your NBEs, *Quality Assistance* offers a complete analytical package to meet the EMA and FDA requirements, all on one site. Whether it is to extend your analytical capacities or to outsource parts or all of your analytical needs, our experts are here to support your developments.

### mRNA

6 years' experience

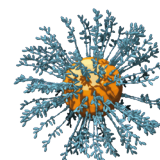

Building on its considerable experience in the analysis of complex innovative drugs, *Quality Assistance* is continuously advancing ways to support the development of your mRNA-based therapeutics and expanding its related machinery and equipment.

### Nanomedicine products

19 years' experience

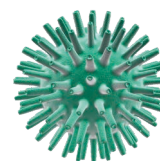

Each nanomedicine requires sound analytical expertise, innovative technical solutions and extensive scientific support. *Quality Assistance* assists you with the design and implementation of your nanoparticle characterisation studies, development and validation of analytical methods for your nanomedicine product.

### Vaccines

21 years' experience

Whatever the type of antigen, *Quality Assistance* covers a wide range of analytical technologies needed to support vaccine development, including product characterisation, development and validation of analytical methods, stability studies, batch testing and bioanalysis to support immunogenicity and protection studies.

### Advanced Therapy Medicinal products

11 years' experience

*Quality Assistance* offers extensive experience with analytical development and validation and GMP/GLP compliant laboratories to assist in the development of your gene therapy and cell-based medicinal products.

## ALL LABORATORIES ON ONE SITE

Bioanalysis

Chromatography

Microbiology

Bioassays

Elemental impurities

Molecular biology

Biochemistry

Mass spectrometry

Protein characterisation

## SCIENTIFIC SUPPORT

### Wide expertise

- All laboratories on one site !
- Extensive experience and state-of-the-art EMA/FDA audited facilities, equipment & software
- More than 230 highly qualified people

### Your priorities are ours, since 1982

- Customised project management
- One dedicated Point of Contact efficiently dealing with your project and helping you to meet your objectives
